About this Document

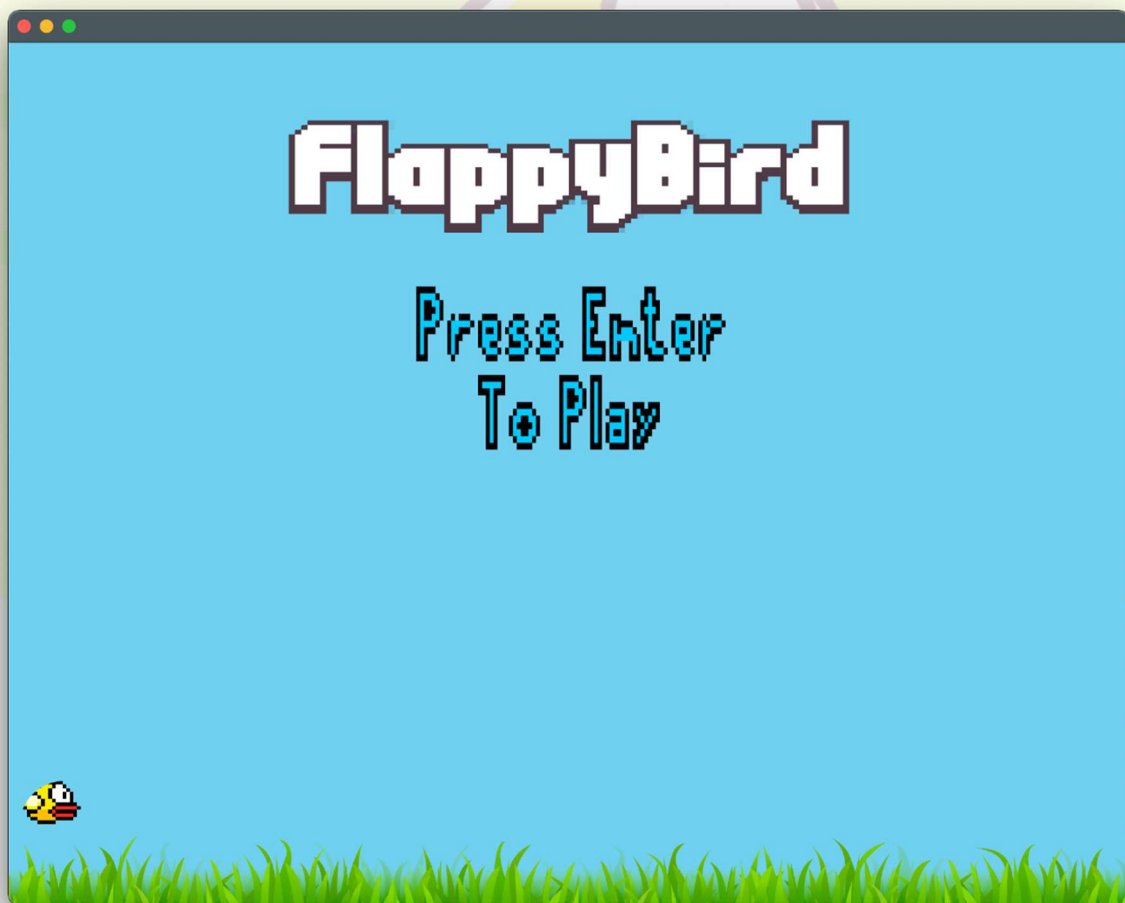

This document is a tutorial. Tutorials are designed to be step-by-step instructions specifically created to walk a beginner through a particular task from beginning to end. To facilitate effective learning, tutorials provide examples to illustrate the subjects they cover. In addition, tutorials provide guidance on how to avoid common pitfalls and highlight key concepts that should be remembered for future reference.

About this Game

Flappy Bird is an arcade-style game in which the player controls the bird Faby, which moves persistently to the right. The player is tasked with navigating Faby through pairs of pipes that have equally sized gaps placed at random heights. Faby automatically descends and only ascends with the player's input. Each successful pass through a pair of pipes awards the player one point. Colliding with a pipe or the ground ends the gameplay.

How to play

When the Flappy Bird game is launched the player is displayed with a screen as seen in image below.

Once on the start screen, the player will hit “Enter” to start the game. The player will be able to control the birds jump by pressing space key. Once the player successfully passes through a pipe the score counter on the top left of the screen will +1 to the counter.

If the player fails to make through the pipe gap the game will be over and the final score will be displayed. The user will be able to play again by hitting the Enter key to start the game again.
